Dawn, I did not receive the email your office sent. Further, I've had a few minutes to dig out three emails from 2024 that you say Armstrong didn't receive. Yes, I realize I sent them to his campaign for Governor. This was the public email that I was routed to when searching how to reach Armstrong.

You'll notice one letter refers to a previous letter, which I got a very suspicious response from. This would be yet a fourth letter you don't have record of, despite me reading the "suspicious" response from Armstrong's office on a news podcast.

Since you have no record of them, you should be alarmed. This would prove my claims of FISA abuse preventing me from reaching my rep and Armstrong from doing his job.

Attached are the reports I sent on December 10th 2024 and November 27th 2024.

Yes, I also called; not once, but several times. I haven't yet retrieved those videos.

The ball is in the Governors' court. I don't see how this email can be ignored. It will be published soon. I sincerely hope the Governor will speak up loud and clear: "A man claiming to be Trump, and America's best witness against the deepstate criminals who attacked (us) has provided evidence that he was prevent from reaching (me) while I was his rep on the Weaponization committee." Further, I am claiming to be an unheard witness in Pam Bondi and Kash Patel's investigations. I can't understand why the Governor and his advisors would be complicit in silencing me.

Still hopeful, Ferris Broxton
