Dear AG Pam Bondi,

I'm am an eye witness to your review of weaponization.

I've been silenced by FISA abuse for many years. I've tried to come forward for many years after "stinging" Sally Yates using FISA to run fraudulent cases, ie. stealing. In the course of stinging Sally, I agreed to "take care" of some "secret Judge and prosecutor."

Now, it seems that every Federal Judge and prosecutor who saw the video of that "sting" have issued a FISA warrant, planning on getting their portion of the multi-million dollar heist. It's a long story, much of the evidence and my testimony is on Rumble under my name: Ferris Broxton.

During the course of "stinging" Yates, she revealed that she expected Trump would be a candidate that her group didn't control and vowed to do anything necessary to shut him down.

I was dean student advisor for Physics UGA 1998, CEO for a company I founded; quite competent. I've been investigating this group and their historical corruption since the founding of our country to modern day. I look forward to helping you expose the criminals who have attacked our president and country. Sincerely, Ferris Broxton
Ps, I'm a witness against Fanny Willis as well for failing to tell Trump he has a witness in his favor.
