

Attempted to hand deliver to *Kingston* *E. Mironela* refused any assistance

William Barr,

6/24/2019

I am a witness against many of the individuals named and un-named in your investigation of FISA abuse and the origins of the Trump investigation. I have a boat load of evidence of corrupt FBI, CIA, and NSA agents contacting me via text, phone, and in person. I have evidence of them intercepting my communications and attempts to get away from them and report them. Unfortunately, just like Sally Yates said when she set up this racket, "we won't let you." Many of her other comments I have recalled and the people she named have in fact been involved in my case, some in the President's case also. I have written many accounts of how this started for me and the bizarre way I stung Sally and this criminal organization but perhaps one of the most obvious points can be made by starting at the end. About 3 months ago Jackson County GA paid \$400,000 in a ransomware heist to Sally's family run county. Sally's Brother in Law, Bruce Yates was the county Commissioner/Police chief, her children worked in the county jail. Whoever had to sign off on the payment was under Sally Yates at one point and she had the opportunity to collect all the complaints against them. She also had the contacts and ability to use US assets to conduct such a heist. One of her statements to me was "I'm going to get all I can, while I can." She would make excuses for pillaging the treasury like "we didn't start the fire." The Sheriff in Jackson county, Janice Mangum is related to me through me ex-family. Sally Yates transcription fixer was my mother in law Sandy Saxton. Her other daughter married Janice's nephew. That might not seem like much of a lead until you know the Chief Superior court judge David Motes lived behind Sandy (his previous stenographer). I've watched her fix transcripts for Sally Yates but had no idea what was happening at the time. Holly and Mark Mangum purchased the house across the street from her that backed up to a private trail leading to Judge Motes back door after the last owner moved. There was a big scandal and our DA, Tim Maddison went to prison for pillaging the victims fund. While investigating my case ten years ago, I come across this scandal and an FBI cover-up involving Rob Russell the 3rd? Richard Russel's (yes the spy-master) family and several other "unrelated witnesses with common threads" to my case.

This case and attack on our President is about a criminal organization in the spy community that has been pillaging the treasury and exploiting anyone they can. Like any crime or lie, one offense often leads to another and this appears to be the situation that is motivating the massive abuse of FISA. My case exposes a flagrant and massive waste of intelligence assets...used for fraud! When I stung Sally, I asked her.... "so you want me to train your agents?" That is exactly what they have been doing...using me as massive fraudulent training exercise with the end plan to give me a huge settlement, split the loot and disappear until everyone forgets about it and all statutes have tolled. I got into it to catch the people who attacked me and kidnapped my precious son, who I haven't seen in 9 years. Truth be told, I did agree to it at one point while face down, restrained, and after being horribly attacked by my wife, an anesthetist, and a scientifically orchestrated plot to gain full control over someone. I never intended to cooperate and every-time they tried to gain better cooperation from me I got better at catching them.

I have found a wall of obstruction from a couple of John Durham's assistants and recorded them for you to evaluate their behavior. Looks to me like there are still a few FBI and CIA who are obstructing this case. In fact, anyone who ever took part of one of the heists in anyway would be prone to obstruct it. These FISA abuse jerks are really hurting me and I look forward to getting relief and helping you put the pieces together on your case.

Respectfully, Ferris Broxton Jr 801-989-4460
